Cyberbullying is viewed as an especially troubling form of bullying due to the 24/7 access and often anonymous nature of the attacks. Parents, schools, and communities sometimes struggle with how to best prevent and intervene when cyberbullying occurs.

This in-depth and informative conference will offer the latest knowledge and best practices for recognizing and responding to cyberbullying. Professionals working in education, mental health, law enforcement, social service, and other youth-centered fields will gain new information and skills that they can then put into practice to effectively intervene and respond to cyberbullying.

September 19, 2012
8:00 a.m. to 3:00 p.m.
