To use the instructor computer

1. Turn on projector using the remote (power button circled in red):

2. Boot up computer – Power button on back of Mac

3. Turn on SMART Sympodium (button circled in red):
Once the computer and SMART Sympodium have finished booting up the projector should automatically detect the video signal.

**Important Note about the SMART Sympodium:** You do not need to use the SMART Sympodium if you don’t need it, however it does need to be powered on. The video signal passes from the computer to the SMART Sympodium to the projector. If you do want to use the SMART Sympodium you must use the provided instructor computer. You cannot connect your own computer to the SMART Sympodium.

**To use your own laptop**
1. Connect your computer via the VGA video cable on the instructor’s desk:

   ![Image of VGA cable connection](image)

2. Turn on the projector using the remote (see above).

   If you have any issues please contact the GSE Help Desk at 645-1375 or if it’s a non-urgent problem submit a help request at [http://gse.buffalo.edu/help](http://gse.buffalo.edu/help).
