Disease imovie project

Choose a disease from the list below:

Flu	Diabetes	Cancer	AIDS
Ebola	SARS	Small Pox	Anthrax
Chicken Pox	Mononucleosis	Hepatitis	Measles
Lupus	Heart Disease	Tay Sachs	Multiple Sclerosis
Huntingtons	Marfans	Dwarfism	Osteoporosis

*if there is a disease that you are interested in researching that does not appear here, please discuss it with your teacher.

DAY 1: Choose a disease and have it approved by your teacher. Answer the following questions using any of the resources in the library.

1. What are the symptoms of the disease?
2. What are the treatment options for the disease?
3. Does the disease have a cure?
4. Is the disease fatal?
5. How is the disease transmitted?
6. Who is at risk for the disease?
7. How many people are infected with the disease?

DAY 2: Create a story board for your movie. Begin to search for pictures to include in your movie. Save all internet pictures to your network folder. If you plan to use live video, you must record it today or tomorrow. You must also come up with a catchy slogan to accompany your movie.

DAY 3: Continue to work on your story board and to compile pictures and video. Your storyboard must be completed by the end of class today. Have your teacher initial here _____ when she has seen and approved your storyboard. Your teacher will pull each group aside during class today to show you how to import clips into imovie and add effects.

DAY 4: Each group will import their clips into imovie and begin to edit their footage. All movjes must be saved in the imovie folder!

DAY 5: Continue to edit your footage. Add sounds, effects, transitions, and music.

DAY 6: Complete your movie and export it. Your teacher will help you to export your film.
